

Islam Alone is the Way out of a Policy that is a Combination of Failure and Lies

(Translated)

The rope of lying, which is short, has reached its end, revealing what is hidden, and the reality of the fuel crisis is exposed, when the Minister of State of the Ministry of Oil addressed the Parliament on Wednesday 02/05/2018 and said:

"The reason for the crisis is the failure of the government to provide \$102 million for the maintenance of the refinery and the importation of the fuel reserve," (*Al-Jareedah* Newspaper Issue No. 2454). According to *As-Sudani* Newspaper (Issue No. 4418), the minister shed tears of grief over the escalation in fuel crisis, and the inability of the ministry to compensate citizens for the losses suffered in agricultural projects, and the death of their animals!!

In light of these statements, and in light of the series of long lies of the arrival of ships, and the relief from the crisis in days or hours, we have the right to ask whether the refinery is maintained or not, due to the financial inability of the state?! Note that the minister himself, speaking at the University of Sudan last Tuesday, said that the exit from the crisis would take time (*As-Sudani* Newspaper Issue No. 4417). Then he spoke the next day directly to the parliament, saying "entering the refinery requires 4 to 5 days" (*Al-Jareedah* Issue No. 2454), noting that the refinery, according to the Minister himself, provides only 42% of the consumption of gasoline, 75% of petrol consumption and 93% of gas consumption.

The economic policies initiated by the government since the beginning of the current year 2018, which the people of the country suffered from in the form of high prices, and successive crises in bread, sugar, fuel, and even all goods. The government follow the plans completely of these studied policies, it is implementing the IMF's instruction, hoping that in return it will get the prohibited interest, that calls for war with Allah (swt) and His Messenger (saw). Thus, the government began steps to float the pound, it reduced its value by half, and doubled the customs by 200% and then took steps to lift support from the goods, this doubled the price of the loaves of bread, and doubled the price of sugar, and the fuel ran out, and the black market started as an introduction to the acceptance of the people for the rise in commodity prices, under the policy of taming the government to enter into full obedience to the IMF!!!

This is the reality of the government's policy that brought the country to this state of total collapse. This was recognized by the Prime Minister, Bakri Hassan, in his address to the Parliament on 30/04/2018 where he said: "Austerity measures carried out by the budget of 2018 were supposed to be implemented since 2011, after the separation of South Sudan, but it was deferred for the circumstances of the citizens". Al-Bashir himself made the same confession, speaking on 27 April 2018 to the Shura Council of the Islamic

Movement when he said: "The country is now heading for radical solutions to the problems of the Sudanese economy."

So the state policy is the failure itself, this is by the state's own recognition. The attempts to mislead by calling this failure radical solutions is a naive repetition of the words of economic pirates; the IMF experts; who sometimes describe their damned instructions as an antidote to treat the economic distortions; and sometimes described as radical solutions; and other lies. Therefore, the government's talk that the cause of the economic collapse is due to the actions of so-called fat cats or the greed of traders; or the people's panic; or the black market; or the smuggling... All these alleged reasons are mere lies to divert attention from the government's conspiracy with the IMF against the interests of the people and the country.

The real reason for the deterioration of the economy and successive crises is the government's departure from obedience to Allah (swt), and its pursuit of full obedience to the enemies of Allah; America and its institutions; the IMF and the World Bank.

O Our people in Sudan:

The fundamental solution given to you by Hizb ut Tahrir, is the great ideology of Islam. Because it is a system of life from the Expert and the Wise, which is suitable for our lives and our Hereafter, because it requires us to rely on Allah (swt), and then self-reliance, and removes from us the hardship of the capitalist regimes, and the shackles of its taxes that halted the production, and spread unemployment, and impoverished the people, and surrendered the country and its wealth to the enemies, blocking the horizon of the solution in front of the government, except from begging at the doors of enemies. And it cut off the strong rope of Allah (swt), and reached out to the ropes of the enemy, and the weakest of houses is the spider's house if they knew!

The way out is only by implementing the systems of Islam in the Khilafah state (Caliphate), so be from the workers on the project to resume your life by Islam, by it alone victory is achieved in the world and the Hereafter.

﴿يَا أَيُّهَا الَّذِينَ آمَنُوا اسْتَجِيبُوا لِلَّهِ وَلِلرَّسُولِ إِذَا دَعَاكُمْ لِمَا يُحْيِيكُمْ﴾

“O you who have believed, respond to Allah and to the Messenger when he calls you to that which gives you life.” [Al-Anfal: 24]
