Hizb ut Tahrir / Wilayah Syria: Campaign

**“NO to the Crime of the Political Solution! YES to Toppling the
Regime and Establishing the Khilafah!”**

(Translated)

The Kaffir West, led by the United States of America, has been plotting against the "revolution" of Ash-Sham and its people over the past nine years, and in that it has used all means and methods to attack the people of Ash-Sham and drive them to the massacre of the so-called "political solution." This solution consecrates the Kaffir West's colonization of Ash-Sham (the Levant) at all levels: political, economic and even cultural, by replacing one client with another in the best of cases, which means eliminating their movements and recreating the secular system that separates Islam from life anew, causing all the sacrifices of the people of Ash-Sham to go to waste in this life without realizing what the people of Ash-Sham were seeking... to topple the criminal regime with all its pillars and symbols, and establish the rule of Islam in its place.

The unbelieving West knows very well that the power of Muslims lies in the birth of a new political system, with the Islamic doctrine as the basis. It realizes that the establishment of the Khilafah Rashidah (rightly guided Caliphate) upon the method of the Prophethood which the Messenger of Allah (saw) gave its promised glad tidings will pose a grave threat to the West. It will uproot its influence, not only from Ash-Sham but from all Muslim countries, and will pursue the Kaffir West in its own territory, carrying Islam as a message of guidance and light for all humanity.

How can the disbelieving West and its apparatuses not fight the "revolution" of the Sham?! It was the one who worked relentlessly for centuries to eliminate the Khilafah state that united all Muslims. The Khilafah was the bulwark of Islam and Muslims, and therefore the Kaffir West was keen in most of their conferences concerning the Levant for the secularism and patriotism of the state to ensure the separation of Islam from the state and society and to preserve the criminal agent-client regimes.

The Kaffir West has set up a committee to draft a secular constitution, whose members are chosen by them to ensure a constitution tailored to size. That preserves his interests, achieves his goals, and consecrates subordination to him, and this alone is what pleases him, and angers the Lord of the worlds, and there is no greater crime
